Projects

IE Home Website
a modern, responsive website for IE Home, using modern technologies such as Next JS and Tailwind CSS The project included using a Headless CMS (Strapi) integrated with PostgreSQL DB for seamless and efficient content management. Overcame challenges like optimizing SEO, enabling dynamic metadata, and deploying the website on a VPS for high performance and scalability.
https://iAbdullah.dev/ar/projects/ie-home-website ⧉

MinimalNext Folio
a minimal & modren open source Next.js Portfolio website with intergration with a headless CMS (Sanity). The project has Clean, modern design with responsive layout, multilingual support (Arabic & English) using Next-intl, Sanity CMS integration for easy content management, and dedicated project showcase and blog sections.
https://iAbdullah.dev/ar/projects/minimalNext-folio ⧉

Wa Lo Ayah - Automated Quran Verse Posting
an automated Twitter account (@WaLoAyah) that posts a Quran verse image every three hours. Implemented the solution using Python to interact with Twitter's API, and leveraged AWS Cloud Services (Lambda, S3, EventBridge) for scheduling and automation.
